

# Food and feed products to which maximum residue levels apply

Includes Part 1 of the GB MRL Statutory Register

- GB MRL Decision Number: GB MRL 2021/004
- Date of adoption: 15 November 2021

# Contents

<b>Background</b>	<b>2</b>
<b>Minor Amendment to Part 1 of the GB MRL Statutory Register</b>	<b>3</b>
<b>Appendix - Part 1 of the GB MRL Statutory Register</b>	<b>4</b>
Part 1 A	4
Part 1B	29

# Background

Maximum residue levels (MRLs) for pesticide residues in or on food and feed of plant and animal origin are established in Great Britain (GB) under Regulation (EC) No 396/2005. <sup>1</sup> As outlined in Article 2(1) MRLs will apply to the products or parts of products outlined in Part 1 of the GB MRL Statutory Register.

Part 1 of the GB MRL Statutory Register is outlined in the Appendix of this document and consists of Part 1A and Part 1B. <sup>2</sup> Part 1A lists the main products or parts of products to which an MRL will apply and Part 1B lists the additional products to which the same MRLs apply.

Article 4 requires the competent authority to establish and maintain Part 1 of the register: HSE has made a minor amendment to Part 1 in relation to the MRLs that apply to radish leaves.

---

<sup>1</sup> Retained [Regulation \(EC\) No 396/2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin](#) (as it applies in Great Britain, pursuant to the European Union (Withdrawal) Act 2018 and European Union (Withdrawal Agreement Act 2020). Great Britain ("GB") refers to England, Scotland and Wales.

<sup>2</sup> Originally set by retained Regulation (EU) No 2018/62.

# Minor Amendment to Part 1 of the GB MRL Statutory Register

Part 1 of the GB MRL Statutory Register includes footnotes to provide additional information for specific products. In Part 1B footnote 3 states that the MRLs for kales shall apply to radish leaves as from 1 January 2022.

The delay in the MRLs for kales applying to radish leaves was agreed in 2018 as there was information that suggested the MRLs for kales may not be suitable for radish leaves. Therefore, additional information was required to confirm the suitability of the extrapolation.

HSE has received confirmation that the data being generated is not yet available. As radish leaves are considered a very minor crop, and the majority of radishes will be harvested for their hypocotyl and upper root, it is appropriate to extend the transition period.

## **Amendment to the footnote for radish leaves**

Footnote 3 in Part 1B of the GB MRL Statutory Register will be amended as follows:

### **(3) MRLs shall apply to radish leaves as from 1 January 2025**

This footnote only covers radish leaves harvested after the 8 true leaf stage. Radish leaves harvested up to the 8 true leaf stage are baby leaf crops and as such the MRL for baby leaf crops (including brassica species), MRL code 0251080, applies.

No other amendments to Part 1 of the GB MRL Statutory Register have been made.

# Appendix - Part 1 of the GB MRL Statutory Register

## Part 1 A

Code number	Category	Group subgroup	Main product of the group or subgroup (1)	Scientific names	Part of the product to which MRLs apply
<b>0100000</b>	<b>FRUITS, FRESH or FROZEN; TREE NUTS</b>				
<b>0110000</b>		<b>Citrus fruits</b>			Whole product after removal of stems
0110010			Grapefruits	<i>Citrus paradisi</i>	
0110020			Oranges	<i>Citrus sinensis</i>	
0110030			Lemons	<i>Citrus limon</i>	
0110040			Limes	<i>Citrus aurantiifolia</i>	
0110050			Mandarins	<i>Citrus reticulata</i> ; syn: <i>Citrus deliciosa</i>	
0110990			Others (2)		
<b>0120000</b>		<b>Tree nuts</b>			Whole product after removal of shell (except chestnuts)
0120010			Almonds	<i>Amygdalus communis</i> ; syn: <i>Prunus dulcis</i>	
0120020			Brazil nuts	<i>Bertholletia excelsa</i>	
0120030			Cashew nuts	<i>Anacardium occidentale</i>	
0120040			Chestnuts	<i>Castanea crenata</i>	Whole product with shell
				<i>Castanea dentata</i>	

Food and feed products to which MRLs apply

Code number	Category	Group	Main product of the group or subgroup (1)	Scientific names	Part of the product to which MRLs apply
		subgroup			
				<i>Castanea mollissima</i>	
				<i>Castanea sativa</i>	
0120050			Coconuts	<i>Cocos nucifera</i>

1070000		Wild terrestrial vertebrate animals	Wild terrestrial vertebrate animals		
1100000	PRODUCTS OF ANIMAL ORIGIN - FISH, FISHPRODUCTS AND ANY OTHER MARINE AND FRESHWATER FOOD PRODUCTS (8)				
1200000	PRODUCTS OR PART OF PRODUCTS EXCLUSIVELY USED FOR ANIMAL FEED PRODUCTION (8)				
1300000	PROCESSED FOOD PRODUCTS (9)				

**Table Legend:**

-  Category
-  Group
-  Subgroup
-  Commodity

N.A. Not applicable.

**Footnotes**

(1) MRLs do not apply to products or part of products that by their characteristics and nature are used exclusively as ingredients of animal feed, until separate MRLs are set in the specific category 1200000.

- (2) The term 'Others' covers any other product not explicitly mentioned under the rest of the codes within the same group or subgroup, in the columns 'Main product of the group or subgroup' of Part A and 'Other products to which the same MRLs apply' of Part B.
- (3) Kernels are defined as whole grains including the bran.
- (4) Kernels are defined as whole grains including the bran. In line with the definition agreed in the CCPR 2016 meeting, for the species and varieties in which husks cannot be (fully) removed by threshing (e.g. barley, oats, spelt, buckwheat, certain pseudocereals), the part of the product to which MRLs apply is 'kernel with remaining (traces of) husks'.
- (5) In all cases the MRL values are expressed as mg/kg of raw milk. Where the residue definition is marked as fat soluble (by the inclusion of a footnote in the GB MRL Statutory Register) the MRL is based on raw cow milk with a fat content of 4 % by weight; for raw milk of other species the MRL value shall be adjusted proportionally according to the fat content of the raw milk of that species.
- (6) In all cases the MRL values are expressed as mg/kg of eggs. Where the residue definition is marked as fat soluble (by the inclusion of a footnote in the GB MRL Statutory Register) the MRL is based on hen eggs with a fat content of 10 % by weight; for eggs of other species the MRL value shall be adjusted proportionally according to the fat content of the eggs of that species, if the fat content is higher than 10 % by weight.
- (7) No MRLs are applicable to other apiculture products until individual products have been identified and listed within this group.
- (8) No MRLs are applicable until individual products have been identified and listed within this category.
- (9) No MRLs are applicable until individual products have been identified and listed within this category. Provisions of the article 20 of Regulation (EC) No 396/2005 (as adopted in Great Britain) apply.
- (10) As from 1 January 2020, the applicable maximum residue level for ginger (*Zingiber officinale*) in the spice group (code 0840020) is the one set for ginger roots (*Zingiber officinale*) in Part 1B of the GB MRL Statutory Register (code 0213040-006, equal to the one of horseradish (*Armoracia rusticana*) code 0213040), taking into account changes in the levels by processing (drying), according to Art. 20 (1) of Regulation (EC) No 396/2005 (as adopted in GB).

(11) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the vegetables category, root and tuber vegetables group (code 0213040), taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005 (as adopted in GB).

N.A. Not applicable.

Food and feed products to which MRLs apply

- (1) MRLs do not apply to products or part of products that by their characteristics and nature are used exclusively as ingredients of animal feed, until separate MRLs are set in the specific category 1200000.
- (2) The part 'except soyabeans/edamame' applied from 1 January 2020.
- (3) MRLs shall apply to radish leaves as from 1 January 2025.
